

CHARGES FOR TREATMENTS AT THE HULL IVF UNIT

Please note the current charges shown below, which will be operative from 01/10/2011 and are subject to change. All blood tests, scans and follow-up appointments are included in the overall costs for each treatment : there are no additional charges for these.

The cost of drugs indicated is an **average** amount: **you will be invoiced for drugs as they are dispensed. Payment will be required immediately on receipt of any drugs issued from the Unit**

With the exception of an IVF ovum recipient cycle, payment for the treatment element of your cycle will be required prior to your dates pack being sent to you. An invoice will be sent to you which provides a costed treatment plan; no dates will be forwarded until this payment is made.

Methods of payment are via: your own or your partner's Credit/debit card (telephone payments are also acceptable), cheques (made payable to East Riding Fertility Services Ltd or E.R.F.S. Ltd.), and cash.

Cancellation fee: i.e. if the patient cancels for non medical reasons: £125.00

TREATMENTS INVOLVING IVF (in vitro Fertilisation)

Fee payable to the HFEA for each cycle of IVF/ICSI treatment that reaches egg retrieval	£ 75.00
